All Weather, Inc.'s New Video Library

Sacramento, CA (October 22, 2009)-All Weather, Inc. (AWI), a leading manufacturer of weather information systems and meteorological sensors, has announced that it has recently completed a Product & Company Video Library for the aviation and weather reporting markets. The video library can be found at www.allweatherinc.com/video/video_home.html<http://www.allweatherinc.com/video/video_home.html>.

There are seven short videos ranging in length from two minutes to seven minutes in which various subjects relating to Automated Weather Observing Systems (AWOS), Meteorological sensors and other topics are shown and explained in an informative and easy to understand media. The seven topics covered are:

- * AWI Overview and Experience
- * AWI's Business Approach and Facility
- * United States AWOS Buying Process
- * International AWOS Buying Process
- * Helipad AWOS Solutions
- * Meteorological and AWOS Sensors
- * NADIN and AWOS Net Services

"The ability to show the AWOS process in a media that is show me, rather than tell me, has been a welcome addition to AWI's information resources," said Jason Hall, President of All Weather, Inc. "These videos give our customers a good visual and increases their understanding of our business and the overall AWOS industry allowing for more informed decisions".

About All Weather, Inc.

All Weather, Inc. (AWI) is a leading developer of high accuracy; high dependability weather information systems that help users minimize risks in an unpredictable world. The company provides AWOS aviation weather systems, air traffic control display systems, as well as a wide range of high accuracy meteorological sensors and systems, including laser ceilometers, runway visual range systems, lightning detection sensors, and a variety of other meteorological sensors. The company's ASOS, AWOS, and AWSS systems meet the stringent standards of the International Civil Aviation Organization (ICAO), the World Meteorological Organization (WMO), and Federal Aviation Administration (FAA). AWI has installed more than 2,800 high-end automated weather systems around the globe, working with such leading authorities

as the U.S. National Weather Service, FAA, ICAO, WMO and commercial users around the world. For more information, see www.allweatherinc.com<<http://www.allweatherinc.com/>>.
