

Radar Short Course on
“Operational Radar Networks and Data Calibration”
14th – 16th October 2008

Ladies & Gentlemen,

SELEX-Gematronik is presenting 2008 again a radar short course, this time with the Topic “**Operational Radar Networks and Data Calibration**”, which takes place on **14th – 16th October 2008** at our company in Neuss, Germany.

The Short Course will be held by **Prof. Witold Krajewski**, University of Iowa, USA, **Dr. Alan Seed**, Bureau of Meteorology, Australia and **Dr. Daniel Sempere Torres**, Polytechnic University of Catalonia, Spain.

The goal of the course is to show the **need and the limits of an operational radar network** and to demonstrate the **necessary effort to build a radar network**. Data calibration methods to validate the obtained network data will be explained and we will have a look into existing radar networks.

SELEX-Gematronik will present its new **METEOR© 50DX mobile dual polarization radar system**. Field tests will include the operational set-up of the mobile system, the measurement of data and the data evaluation (dependent on weather). Please refer to the attached information for further details on the Radar Short Course.

Registration form at:

Workshop Invitation:

http://www.hydrometeoindustry.org/MemberNews/SELEXInvitation_Workshop2008.pdf

For organizational purposes of the Radar Workshop an early reply is highly appreciated. We would welcome your positive reply until to the 31st July, 2008. Please note that the number of participants to this Workshop is limited to 50 persons due to the practical parts and the therefore necessary places.

Please contact Annette Mohr at +49–2137–782214 or via e-mail:

a.mohr@gematronik.com.

Assuring you of our best attention at all times, we look forward to meet you at our Radar Short Course or at the ERAD 2008 Conference in Helsinki, at our booth No.2.

Sincerely yours,

Annette Mohr
