

Meet the NEW

CastAway CTD

Modern technology – yet simple to use, the CastAway is designed for CTD profiling down to 100 m, providing you the data you need in minutes!

- Conductivity, temperature, depth, salinity, sound speed
- Built in GPS
- Built in LCD display for easy data review
- Bluetooth communication (no cables needed!)

Download the CastAway White Paper Now

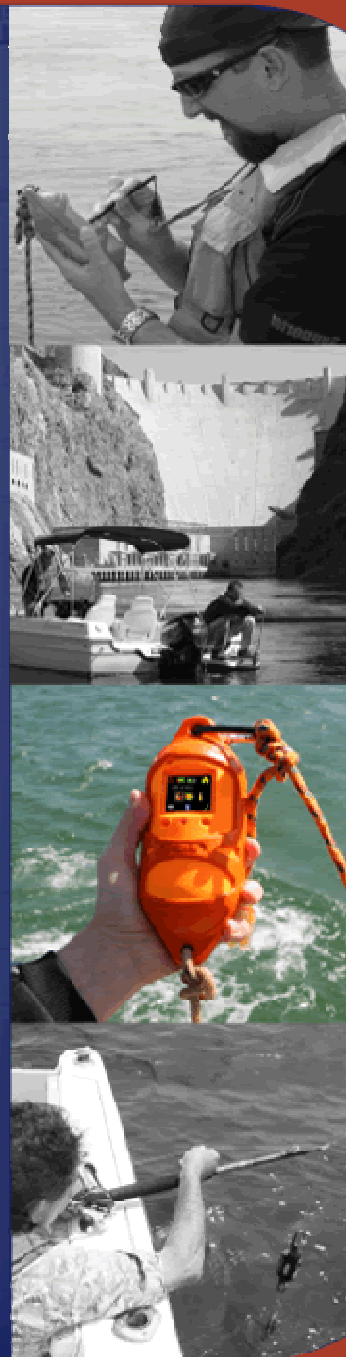

Oceanographers, hydrographers, field technicians, surveyors and researchers now have the ability to quickly collect CTD and sound speed data from any dock, bridge or boat.

With three taps of a stylus pen, simply drop the CastAway in the water, pull it up, and have position, time, conductivity, temperature, and depth in record time. Simply review the data on the built-in display or upload to your PC via Bluetooth. No tools, computers or cables required. Ever.
