

Í THE FIRST OF A NEW KINDÎ a hybrid precipitation sensor

- **LAMBRECHT DGN** combines long term approved standards and innovation by use of two integrated measuring systems.
 - **a new high precision scale system**
 - **and a tipping bucket**
- Unique design, high precise and outstanding practical
 - **amazing resolution of 0,001 mm/m²**
 - **measurable intensity up to 1.200 mm/m²/h**
- *DGN construction volume is only 20% of other weighing sensors*
- *The System is self-emptying due to tipping bucket*
- *DGN has best connectivity due to several interfaces*
- *Winter-proof with electrical heating device*
- *Best price-performance-ratio at the market*

Winner of the Innovation Award 2013
